

Multi-Use Games Area

Our Multi-Use Games Area (MUGA) was damaged in the storms over the May Bank Holiday. We are looking at options to either repair or replace it. It may also be an opportunity to look at upgrading the games surface.

Current Situation:

Quotes were sought for both repair/refurbishment or replacement with new boundary fencing/boarding. There was concern that the boarding was likely to continue to deteriorate, and the structure become less secure more sections of boarding were taken down. Additionally, there was concern that the sections of boarding removed to ground level could still pose a health and safety risk, particularly as it had not been possible to completely exclude members of the public from the area, despite active messaging both on site and on the website.

At its July meeting the parish council decided that all the boarding would need to be cleared and any holes arising from post removal made good. The preference was to do this by means of a working party, with the boarding removed off site and stored for possible future recycling. For these reasons, following the Estates Committee meeting on 5th August (Report **WPC.** as [WPC.EC.21.08.05](#) and **Min. EC.21.08.12** refer), a working party was organised and the boarding removed to a skip for recycling by West Suffolk at a cost of £298.30.

Future Options:

At the Community Engagement Day on 3rd July there were a number of requests for smaller football goals with nets. Other requests included the provision of a 3G Astro turfed area and outdoor table tennis table(s). Outdoor Gym Equipment was also popular as part of further development of the Six Acres and Recreation Ground, and this has been raised in previous consultations with residents.

The clerk was asked to look into quotes and report options to the Estates Committee, for future consultation with the parish as part of preparing a grant funding bid, which could also cover new equipment at the skate park, and the outdoor gym equipment.

Subsequent to the meeting, the site was measured (11m x 13m).

The nearest size MUGA identified is 11 x 15m steel, at £14,600 plus 28 hours installation

In view of the limited space available for the installation of a Multi-Use Games Area on that site, the Estates Committee at its August meeting considered:

- Bounding the site with low level fencing

Hilary Workman
Clerk & RFO
September 2021

WPC.21.09.10 – Multi-Use Games Area

- Re-purposing the site for outdoor gym equipment, which could:
 - a. Meet an identified demand in the parish supported by evidence from the community engagement day, previous meetings and anecdotal request
 - b. Fit with a demand for and move to more outdoor fitness facilities generated by the recent pandemic,
 - c. Provide an opportunity to link into existing fitness classes based at the Memorial Social centre; and
 - d. Bring the space back into use in the short to medium term, with
- Development of new and larger grant funded MUGA, incorporating 5 aside football hockey and basketball, in a new position at the southern most point of Six Acres. This would allow for a MUGA up to 20m x 30m.

We have created the reference J22212 in our "Sports walls / Ball courts" range. This module is accessible from 6 years.

The size of the module is: 30.20 m wide, 15.20 m deep, 3.90 m high.

Specifications

Age range: 6+
Size: 30.20 x 15.20 x 3.90 m

Equipment installation

Number of installers: 3
Installation time: 24/80/00
Concrete volume: 4.20 m³
Total weight: 1080.48 kg
Weight of the heaviest element: 27.36 kg

The Estates Committee was however concerned about possible noise nuisance to residents of Thorns Close in this position. Another issue subsequently identified was the likely need for substantial hard landscaping in this position, and possible drainage issues which might impact on the tennis courts.

Consequently, following advice from a specialist play area provider, when an indicative quote was sought for a new, larger Multi Use Games Area, the North East Corner of Six Acres was considered more appropriate, with less risk of noise nuisance or drainage issues.

An indicative quote for a new MUGA at this location is attached as **Appendix A**

Action:

Councillors are asked to indicate whether they support the Estate's Committee's proposal for future options to redevelop the old MUGA space for outdoor fitness equipment and research and consult on the development of a new MUGA.

Hilary Workman
Clerk & RFO
September 2021

Re-development of Old MUGA space:

There are a range of options for outdoor fitness stations which could be sited within the old MUGA space.

Dependant on the style of fitness equipment and range, it may be that a re-surfacing of the area be considered (particularly if the range of equipment decided upon includes free-fall opportunities). The most cost-effective solution, which could bring the space back into use with outdoor fitness stations in a more timely manner, would be to limit the choice of equipment within the MUGA space to low level (below 600mm) cardiovascular equipment which therefore requires no safety surfacing beneath it. The equipment conforms to EN16630 specification (this is the safety standard for outdoor gym equipment).

Adult Activ8 Outdoor Gym Multi-Unit

Adult Spacesaver Outdoor Gym Multi-Unit

In this way, there would be no need to re-surface or replace the existing tarmac. The suggested equipment shown above would accommodate up to thirteen users at any one time.

An additional Timber Gym Station, designed for body weight exercises, dips, pull ups, presses etc could also be sited just outside of the fenced area.

WPC.21.09.10 – Multi-Use Games Area

An indicative quote from Playforce (£15,072.10 plus VAT) based on this option is attached as **Appendix B**. Playforce has offered the whole project (including supply and installation of new bow top fencing to bound the area at a discounted to £19,600 plus VAT.

There is funding for the Teen project replacement in earmarked reserves (£12,500) which could form the basis of seed funding for a larger grant application.

Action:

Councillors are asked to indicate whether they support the proposal above to research, consult on and apply for grant funding to re-purpose the old MUGA space for:

- **low level cardiovascular equipment, with no requirement to re-surface the existing tarmac; and**
- **An additional Timber Gym Station, which could be sited just outside of the fenced area.**

If Councillors agree to the proposal above:

Fencing in of the existing MUGA

Three quotes have been requested based on bow top fencing (of a similar style to the skate park), at varying heights of 1m, 1.2m and 2m, including self-closing child safe gate for the area, attached as **Appendix C** to this report.

The parish council has power to undertake this work under Public Health Act 1875, s.164. There are earmarked reserves of £12,750, part of which the parish council could determine to use to fund this work (which could then form part of the parish contribution to the larger project).

The parish council has worked with Playforce on two previous projects. Their quote includes removal and disposal of the basket ball hoop to ground level and re-use of the eastern entrance through provision of staggered bow top fencing, allowing for access to an additional Gym Timber Gym Station in the future.

Recommendation:

The parish council authorise the cost of works £ to the old MUGA space on Six Acres to include:

i.	Removal and disposal of a basket ball hoop at Ground level	£ 112.50
ii.	Undertake repairs to damaged tarmac area	£ 654.37
iii.	Supply and install Green Bow Top fencing to a height of 1.2m	£4269.80
iv.	Delivery	£212.55

At a total cost of £5249.22 plus VAT, undertaken by Playforce, and approve the transfer of £5,250 from earmarked reserves (Teen Project Replacement) to General Reserves.

There is an opportunity to apply for funding coming up through West Suffolk's Community Chest (last submission date 29th October 2021), and the clerk is looking for other match funding opportunities. Additionally, Playforce offer a free of charge funding service (where either the parish council agrees to proceed with that company if a funding application is successful, or the bid is unsuccessful).

Hilary Workman
Clerk & RFO
September 2021

WPC.21.09.10 – Multi-Use Games Area

The autumn could be used to consult with residents of the parish about the type of equipment that would be best suited for a re-purposing of the area and development of a new MUGA, building engagement and an understanding of costs. A Graffiti workshop is planned for the October half term, and this could double as an opportunity for community engagement and consulting on options for the outdoor gym, MUGA and new equipment at the skate park.

The November meeting of the parish council could then be used to consider a business case for the proposals and delegate authority to the clerk to apply for grants.

The December meeting of the Estates Committee could then be used to finalise proposals to be included in a grant application, having considered the responses from consultation questions and the engagement day at the skatepark in October.

A grant funding bid would therefore be likely to include:

- Re-purposing the Multi-use games area for outdoor fitness, including:
 - New low level cardiovascular equipment and
 - A Timber Gym with safer grass matting just outside the old MUGA space
- New equipment to replace grind rails in the skatepark (and consider replacement of half and quarter pipe surfaces based on professional advice
- Development of a new Multi-Use Games Area, possibly at a site in the North-east corner of Six Acres; and
- New bow top fencing for both the cemetery road and bury road play areas.

Action:

Councillors discuss and agree a proposed timescale for developing the project, and whether or not to include a proposal for new bow top fencing at Cemetery and Bury Road Play parks.

Recommendation:

The parish council delegate the clerk to submit any appropriate grant applications to attract funding for the development of the re-development of the old MUGA space for outdoor gym equipment.

Dear Hilary,

Re: Supply & Installation of new Multi Use Games Area (MUGA)

Firstly, many thanks for taking the time to meet with me recently to discuss the potential new exciting outdoor project at your memorial open space.

Following our discussions, I am pleased to attach the quotation to supply and install a Sport England Regulation Sized (36.6mL x 21.35mW) tarmac Muga, including metal fencing with goal ends and basketball hoops. All baseworks and thermoplastic line markings are included in the total price below.

We are able to offer you with a free of charge funding service to take the stress out of your outdoor project. We require commitment that once we have secured the funds with you that the order is placed with Playforce (otherwise the service charge is applicable) then we will get cracking on raising the money for you. this service normally takes around 9-12 weeks.

I hope you have found the above information will be of interest to you and if you require any additional information please do not hesitate to contact me directly.

With kindest regards,

John Hambrook

Playground Inspections

The British Standards for Playground Equipment and Surfacing, BSEN 1176 advises that all playground installations should be inspected by a competent person, and that the schedule should include routine daily/weekly inspections, operational and annual inspections.

We can take the hassle out of organising these for you with our Playforce Care inspection package. This covers the main annual inspection, three operational inspections and also includes on-site training for a member of your staff in undertaking weekly and monthly routine inspections. There are also discounts available for multiple sites in the same locality.

If you would like to include this inspection package, please indicate this when placing your order.

* Annual Inspection Package – includes 1 x independent RP11-accredited annual inspection and report, 3 x quarterly operational inspections and on-site training for a member of your team	£ 525.00

www.playforce.co.uk/important-info

playforce A green icon of a hand with fingers spread, positioned to the right of the word 'playforce'.

The Playforce Design & Build and Playforce Sale of Goods terms and conditions available at www.playforce.co.uk/important-info ("Terms and Conditions") shall apply to any orders that you may place with us and that order is made subject to those Terms and Conditions. By placing an order with us for goods and/ or services, you confirm that you have read and agree to the Terms and Conditions. In particular, please ensure that you read and agree to clause 12 of those Terms and Conditions which contains limits on our liability. Please note, all deposits are non-refundable.

All plans, quotations and correspondence between Playforce and the addressee are to remain strictly confidential between those parties only. Our customers value our uniquely creative designs, which are one of the qualities that set us apart from the competition and aid us in achieving best value!

All of our play equipment and safer surfacing conforms to the British and European Playground Safety Standards BS EN 1176 and 1177.

Please note that line markings and wetpour surfacing are weather dependent and as a result they may not be completed at the same time as the equipment installation. In this event, we may invoice the individual elements separately. When this is done, we will expect payment of each separate invoice in accordance with our terms and conditions. Wetpour surfacing colours can be affected by UV light at the time of installation. This will only be a temporary colour change, before the surfacing returns to its intended vibrant colour.

Tarmac surface skims are installed onto existing surfaces with the understanding that Playforce Ltd will not be held responsible for future repairs resulting from weed growth damaging the tarmac surface.

Playforce recommends the installation of kerb edging when installing wetpour surfacing onto tarmac / concrete and other hard surfaces. This type of edging detail provides a suitably firm fixing point for the surface and protects the surrounding hard surface from future cracking or failure. Chased edges can be provided but Playforce does not accept responsibility for any future repairs to the tarmac / concrete / hard surface or wetpour resulting from the expansion and contraction forces exerted by the surfacing.

Softbond mulch is frequently specified for installation onto existing grassed areas. Whilst we take care to ensure the suitability of the ground conditions at the time of specifying the product, there can be occasions when the ground beneath the softbond mulch, over a period of time, can move, causing the softbond mulch to sink. For this reason, Playforce advises the laying of an MOT Type 1 base before laying softbond mulch. Playforce therefore does not cover the costs of repairing these areas under warranty should the MOT option not be chosen.

Please note that we are unable to offer a warranty on wetpour repairs or surface skims with regards to the bond to an existing edge or existing surfaces. We would not recommend patch repairs, especially along edges as a suitable long-term solution.

The customer / client is reminded that it is their responsibility to ensure grassed areas are regularly cut and maintained to a height not exceeding 50mm, prior to the installation of any surfacing that may have been ordered. Failure to do so will incur costs for delays; any aborted visits or any other cost interrupting planned work.

We recommend that all existing court markings are removed before laying new line markings. Please note that removal of line markings come at an additional cost and this is not included with new line markings unless included specifically in your quotation. Failure to remove line markings before laying new ones will mean we are unable to offer a warranty on the new thermoplastics. We are also unable to offer a warranty for laying line markings over excavated or joined tarmac.

To place your order, either send an e-mail to John.Hambrook@playforce.co.uk, stating your quote reference number (as on the top of this quote) and the value that you approve, or sign and date below and fax, email or post the confirmation back to us.

I agree and accept the above quotation from Playforce Ltd reference number 131694 dated 2 February 2021 to the value of £_____.

Good Afternoon Hilary,

Apologies I missed that it is the bow top fencing you are after. we supply this in 1m or 1.2m heights.

- supply & INstallation of 49 linear metres of 1m high painted steel bow top fencing including spung self closing gate - £6,065 + VAT (1.2m height option - £6,675+ VAT)
- Removal of existing MUGA unit - £2150.00 + VAT

I hope that this will be helpful.

Kind Regards

John

Playground Inspections

The British Standards for Playground Equipment and Surfacing, BSEN 1176 advises that all playground installations should be inspected by a competent person, and that the schedule should include routine daily/weekly inspections, operational and annual inspections.

We can take the hassle out of organising these for you with our Playforce Care inspection package. This covers the main annual inspection, three operational inspections and also includes on-site training for a member of your staff in undertaking weekly and monthly routine inspections. There are also discounts available for multiple sites in the same locality.
